

KALEB KING

Business Analyst

PROFILE

I have over a decade of experience in the world of accounting with an emphasis on accounts receivable and sales tax. Over the past few years, I have discovered my passion for data. I have an endless drive to break down a complex topic into its components, understand how they interact with each other, and communicate it in an effective way to people at all levels of an organization. I've written countless SQL queries, dashboards, markdown documents, and I'm always looking for new ways to make sense of the world using data.

EDUCATION

MS in Data Science

University of Wisconsin

2020 - Present

Currently maintaining a 4.0 GPA and completed courses in statistical methods and programming for data science. Expecting to complete by Spring 2024.

BA in Accounting

Lakeland University

2011 - 2015

Maintained a 3.8 GPA and completed courses in advanced financial reporting, federal taxation, cost accounting, and business law.

WORK EXPERIENCE

Business Analyst

Construction Forms

2019–Present

Build customized reports in Excel, SQL, and R. I have focused on report automation to enable more informed decisions while reducing time spent gathering and processing data.

Accounts Receivable Specialist

Construction Forms

2016–2019

Collect and process customer payments. Streamlined invoicing which reduced processing time by 50% and improved accuracy.

Accounting Coordinator

Foley & Lardner

2013–2016

Build customized reports in Excel, prepare and file property tax returns, develop budgets, and perform monthly reconciliations.
